

Asthma Risks and Emergencies

22282VIC Course in the Management of Asthma Risks and Emergencies in the Workplace

Application and Relevance

This course applies to a wide range of settings where emergencies involving asthma episodes may occur. It is relevant for teachers, childcare workers, aged-care workers, disability workers, sports coaches, youth workers and designated workplace first aiders.

Duration

2-3 hours classroom training and assessment with online pre-work; or
3-4 hours total face-to-face training and assessment.

Course Content

This course provides the skills and knowledge to be able to develop an asthma risk assessment and emergency management plan and provide asthma-related first aid interventions in the workplace. It includes:

- + Background knowledge of the triggers, signs and symptoms of asthma
- + Risk minimisation and management strategies for asthma emergencies
- + Guidelines of asthma peak bodies
- + Emergency treatment for an asthma episode
- + Communicating details to emergency services
- + Workplace incident recording and reporting
- + Evaluating responses to asthma emergencies

Prerequisites

There are no prerequisite units for this course. It is recommended that participants have language and literacy skills equivalent to level 3 of the Australian Core Skills Framework (ACSF).

Assessment Methods

Progressive assessment throughout the course, including demonstration of practical skills and written and oral questions relating to underpinning knowledge.

Award Issued

A nationally-recognised Statement of Attainment will be issued to all successful participants.

Please refer to the Student Handbook for additional information.

This Nationally Recognised Training is delivered through Australian First Aid
Registered Training Organisation No.3586
